

A collection of seven water bottles of various colors and designs. One bottle is dark blue with 'SWIM BIKE RUN' in white. Another is black with 'cycles' in white and a flower. A third is white with a cyclist. A fourth is light blue with 'GARMIN' and a world map. A fifth is dark blue with a landscape. A sixth is black with purple abstract shapes. A seventh is partially visible on the right. A circular logo in the bottom right corner states 'BPA FREE' and 'NON-TOXIC PLASTIC'. The word 'hure' is partially visible in the bottom left corner.

Tacx
BRANDED BOTTLES

Branded Sports Bottles by Tacx, trust in the experts!

You may already have used a Tacx bottle. It wouldn't be surprising, as we have been the sector specialist in the production and printing of drinking bottles for more than 25 years. A pure Dutch product.

Our customers are increasingly aware of a healthy lifestyle and often ask for environmentally friendly promotional items that are produced in an ethically responsible and sustainable way. For the development of our products we are constantly looking for new raw materials that are greener, cleaner and as environmentally friendly as possible. To do this, we continuously test, measure, manage and report our processes in our factory with Sedex certification and by our ISO-certified printer.

This is how we try to make a positive contribution to the environment.

SPORT BOTTLES

Used by millions to hydrate and quench thirst

TACX SPORTS BOTTLE, THE ULTIMATE AFFORDABLE PROMOTIONAL EYE-CATCHER

Although we are all busier than ever, we all need to try to pursue a healthy lifestyle. Many Corporates promote this vigorously, after all a healthy team is a motivated team. You increasingly see that we are all encouraged to lead an active lifestyle; ride your bike to the office, participate in sports and basically do any kind of physical activities to improve your status of being in good health. A high quality branded Tacx sports bottle fits into the lifestyle perfectly. It's not only a functional, fun, and reusable product to have, but also protects the environment from single use plastic.

DAIYA, THE NEW TACX BOTTLE WITH AN EDGY LOOK AND FEEL

Diamond shaped cap for extra grip. Leakproof one twist cap and soft pull-lid with a high flow water rate for instant hydration. Extra large fill opening for easy refilling and cleaning. Dishwasher safe. BPA free. 100% recyclable and refillable. Eco options available.

Daiya & Shiva 02, Daiya, Shiva & Fuse Bio

ECO BOTTLES

Biobased made from sugarcane or biodegradable

POSITIVE CONTRIBUTION TO THE ENVIRONMENT

At Tacx, we believe in sustainability and reducing single-use plastics. Our bottles are crafted from high-quality raw materials, ensuring durability for years to come. By choosing Tacx, you're joining us in the fight against single-use plastics. But it doesn't stop there. In the unlikely event that you no longer need your bottle, rest assured knowing it can be 100% recycled. For those who want to go the extra mile, we offer "nature-friendly" options. Choose our biobased polyethylene made from sugarcane or our biodegradable polyethylene and make an even greater contribution to the environment.

Biobased bottles derived from sugarcane

This bottle is made of biobased material derived from sugarcane. From the residual sugarcane material, we process polyethylene that is used for our bottles. This process is much cleaner than the conventional methods and has a nice added benefit: as the sugarcane grows, it removes CO2 from the air.

Pull-lid not
biobased

Biodegradable bottles

The Shiva Bio shares the same appearance as the classic Shiva, with the key difference being its composition of polyethylene with an organic plastic additive that significantly increases the biodegradation rate, tested and approved according to the ASTM D 5511 standard. Remarkably resilient, this bottle remains unaffected by light, heat, and moisture, maintaining its quality throughout. Once it finds its way into an industrial landfill, the decomposing process begins.

Fuse

LIFESTYLE BOTTLES

Elegant bottle with fruit fusion option

THE PERFECT WAY TO ADD FLAVOUR AND VITAMINS TO YOUR WATER

We all know how important it is to stay hydrated, but sometimes plain water can be a bit boring. That's where Fuse comes in. This sophisticated lifestyle bottle by Tacx allows you to infuse your water with delicious fruit flavors. Simply insert the optional (surcharge) fruit fusion stick into the cap, thread the fruit onto the stick and let the natural flavors infuse into your water. It's a simple and refreshing way to add a touch of excitement to your hydration routine. Fuse offers a stylish solution for those looking to elevate their water-drinking experience.

FUSE, FRUIT FUSION BOTTLE

Most affordable fruit fusion bottle. Ideal size for children's hands.
Also available in 75% biodegradable material. Large area for full colour printing.

Only in black

StarLight bottle crate

Suitable for transporting up to 8 Shiva bottles of 500ml or 750ml and Daiya 550 ml.

Available in black. Pantone match available from 500 pcs.

TECH INFO

File specifications

- Adobe Illustrator 8.0 or higher (eps or vector ai file)
- Adobe Photoshop 5.0 or higher (or Adobe in-Design)

Fonts

- Mac user: please put the letter type in outline and send us the Fonts
- PC user: always change letters into outline

Print area

- Bidon 450ml: 195 x 140 mm
- Bidon 500ml: 235,5 x 100 mm
- Bidon 750ml: 235,5 x 100 mm & 235,5 x 29 mm (upper print area)

Distance between upper and lower part of imprint of the 750ml bottle is 95 mm (heart to heart print).

All-round printing

With an all-round print the beginning and end of the print area will come together at the back causing a blemish line. This must be accepted. As an alternative you can choose a 5mm opening.

Top print area 750ml bottles

When printing on the upper part of the 750ml bottle, the top print is considered additional printing colors. So, 2 colors above and 2 below means a total of 4 printing colors.

Full colour process print: CMYK

It could be, that part of the design has to be made up in CMYK and an additional spot colour. For example, text with a specific pantone colour. Therefore, to ensure your calculations are correct, please always send us the artwork to check the number of print colours required.

Silk screen prints

For each print colour we make an individual screen.

We can print up to 12 colours. Our state of the art printing machine prints 6 colours in one production run.

Printing full colour

When printing a multiple colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. When printing full colour process CMYK, the end result is mat, pixelated and can deviate from the visual proof. Our raster size is 34 dpi.

Printing on coloured bottles

To print a pantone colour onto a coloured bottle, it's necessary to print a white underlay first. No white underlay is required for grey tints, gold, silver and white. In some cases an outline is visible and has to be accepted. The white underlay is calculated as one extra print colour and one extra screen. If white is already part of the design, there is no extra white underlay required. If in doubt, please contact us for information.

Dark bottles + Top of Shanti cap

Dark bottles and the Shanti caps are unfortunately very sensitive to scratches and scuff marks. This must be accepted.

Templates

To create a design we have free templates available.

BRANDED BOTTLES

About us

1957

Tacx was founded by Koos Tacx sr. on May 1st 1957 in the Netherlands.

Family company

Three generations of cyclist fanatics work together to create the impossible.

Produced in the Netherlands

All our products are fully produced in the Netherlands.

A Garmin company

In 2019 Garmin acquired Tacx, enabling endless technological possibilities.

Tacx is now a proud member of the Garmin family. As part of the Garmin company, **Tacx** will remain the same reliable manufacturer and supplier of the promotional printed Tacx bottles you were always able to count on.
