BRANDED BOTTLES

EVERY BRAND DESERVES THE PERFECT BOTTLE

With over 30 years of experience, we specialize in manufacturing and printing reusable Tacx sport bottles, proudly made in the Netherlands. Our range features Eco, lifestyle and sport bottles, each designed with a generous printing area, making them perfect for marketing purposes.

The vibrant, high-quality full-color printing elevates the product to a new level. Combined with our short delivery times and Sedex-certified factory, this makes Branded Sports Bottles your ideal partner for promotional bottles.

HIGH-QUALITY TACX BOTTLES, A RESPONSIBLE CHOICE!

Our bottles are designed for long-lasting use. All components are made from mono-material plastics, which are easy to recycle, minimizing their environmental impact. We feel it is our obligation to continually search for the best materials and follow new sustainability developments to keep improving our products.

Plant-based PE bottles derived from sugarcane

Our Plant-based PE is made from the residual material of the sugarcane plant. First, the sugarcane is harvested for sugar production. The remaining biomass is then processed into ethanol, which is converted into ethylene – the base material for producing PE. This production process is fast and clean and comes with an important added benefit: while the sugarcane grows, it absorbs CO₂ from the atmosphere.

Tacx bottles, a practical choice for sustainability without compromising performance.

SUSTAINABILITY AT BRANDED SPORTS BOTTLES

At Bottle Promotions, we work hard to minimize our ecological footprint. This is how we put that into practice:

- Production runs on 100% renewable energy
- Bottles are made of mono-material plastics > easy to recycle
- Post-production material is recycled in-house (recycling machine)
- Black bottles contain 15% recycled material
- Sedex 4-Pillar certified factory (meets strict standards for ethics, safety, environment & labour rights)
- Bottles last for years – a durable alternative to single-use / packaged water
- European suppliers to keep transport-related CO₂ emissions low
- Continuous improvement in recycling & waste management
- From 2026 onwards, we will compensate a part of our CO₂ emissions with certified carbon credits that support clean-air projects

Made from Mono-materials

ACCESSORIES

Bottle cages

Deva

Bottle cage featuring a unique cylindrical shape that ensures perfect clamping; has proven its worth many times over during cycling classics over cobblestones.

Various colour options

Ciro

Lightweight bottle cage (just 29 g) with slim shape and tight clamping. The glass fiber core makes it durable and structurally reliable.

Various colour options

Radar

This side load bottle cage is designed to fit small bike frames. Constructed from glass fiber compound for increased clamping force.

Only in black

StarLight bottle crate

Suitable for transporting up to 8 Shiva bottles of 500ml or 750ml and Daiya 550ml.

Available in black.

Pantone match available from 500 pcs.

TECH INFO

Silk screen prints

We use silk screen printing for our bottles, with a separate screen for each print colour.

File specifications

- Adobe Illustrator 8.0 or higher (vector ai file)
- Adobe Photoshop 5.0 or higher (resolution 300dpi)

Our preference is for vector files suitable for Adobe Illustrator. Only photos can be provided in Photoshop or as PSD, JPG, or TIFF.

Per email, max. 10MB.

Fonts

Always change letters to outline

Print area

- Bottle 450ml: 195 x 140 mm
- Bottle 500/550ml: 235,5 x 100 mm
- Bottle 750ml: 235,5 x 100 mm & 235,5 x 29 mm (upper print area)

Distance between upper and lower part of imprint of the 750ml bottle is 95 mm (heart to heart print).

All-round printing

With an all-round print the beginning and end of the print area will come together at the back causing a blemish line.

This must be accepted. As an alternative you can choose a 5 mm opening.

Top print area 750ml bottles

When printing on the upper part of the 750ml bottle, the top print is considered additional printing colors. So, 2 colors above and 2 below means a total of 4 printing colors.

Full colour process print: CMYK

It is possible that a design must be made up partially in cmyk and a part in spot colours. For example, small text cannot be made up in cmyk and needs to be printed in a pantone colour. To ensure your calculations are correct, please always send us the artwork to check the number of print colours required.

Printing full colour

When printing a full colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. With the full colour printing process (CMYK), the result will be matte, pixelated and colours can slightly deviate from the visual proof. Our raster size is 34 dpi.

Printing multiple pms colours

When printing a multiple colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. With PMS printing, the result is a shiny print. Colours created from a part of a PMS colour will be pixelated. Our raster size is 34 dpi.

We use the Pantone Solid Coated colours. Only these colours can be printed.

Printing on coloured bottles

To print a pantone colour onto a coloured bottle, it's necessary to print a white underlay first. No white underlay is required for grey tints, gold, silver and white. In some cases, an outline is visible and must be accepted. Please ask for details. The white underlay is calculated as one extra print colour and one extra screen. If white is already part of the design, there is no extra white underlay required. If in doubt, please contact us for information.

Dark bottles + Top of Shanti cap

Dark bottles and the Shanti caps are unfortunately very sensitive to scratches and scuff marks. This must be accepted.

Templates

We offer free of charge templates to create a design.

CHAMPIONS RELY ON TACX BOTTLES

We are proud to be a technical partner of many World Tour teams, Pro-continental teams, Continental teams and Women teams. It is through this collaboration with professionals that we are able to develop high-performance bottles that athletes trust and rely on.

Trusted by Professional Cyclists Worldwide

This bottle is the favorite among the professional cyclists of our partner teams.

All bottles and bottle cages are produced in our own factory in the Netherlands, allowing us to control and guarantee quality. For the best grip, we always recommend combining a Tacx bottle with a Tacx bottle cage.

Don't miss this opportunity to benefit from these sought-after eye-catchers!

Available in boxes of 50 or 25 pieces per design. Delivery time 3-5 working days.

BRANDED BOTTLES

About us

1957

Tacx was founded by Koos Tacx sr. on May 1st 1957 in the Netherlands.

Family company

Three generations of cyclist fanatics work together to create the impossible.

Produced in the Netherlands

All our products are fully produced in the Netherlands.

A Garmin company

In 2019 Garmin acquired Tacx, enabling endless technological possibilities.

Tacx is now a proud member of the Garmin family. As part of the Garmin company, Tacx will remain the same reliable manufacturer and supplier of the promotional printed Tacx bottles you were always able to count on.
